

# Élitra

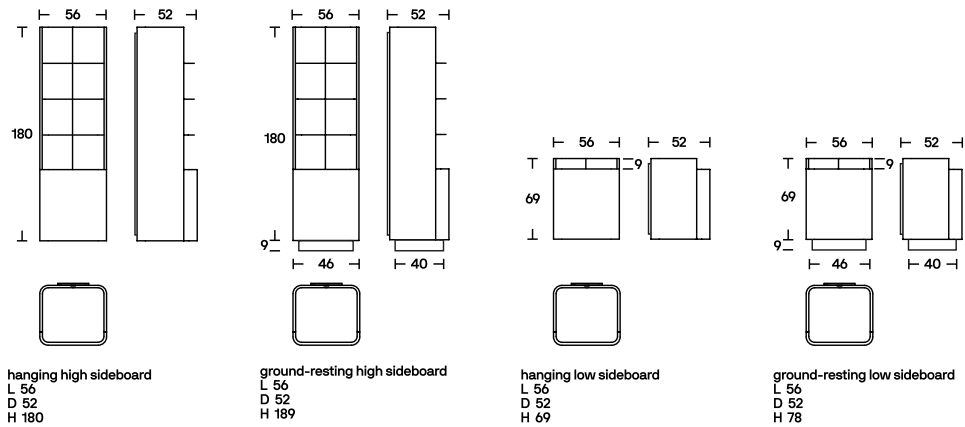

---

Year	2024
Designer	Pietro Russo

---

The Élitra storage furniture is distinguished by its shell-like structure, available in wall-mounted or floor-standing options. Its soft shapes and two curved elements at the back define the volumes, making them light and harmonious. The versatility and personality of each item allow for its use individually or in conjunction with other elements from the same series, creating a flexible and open system. Available in low and high versions, the latter featuring visible glass shelves, Élitra reflects Acerbis' ethos through its meticulous selection of materials and finishes. In continuity with the company's historical identity, the furniture is available in dark stained walnut with matching or glossy lacquered doors, or in the fully lacquered version. A piece of furniture with a strong identity, transcending ephemeral trends.

Dimensions

Finishes

The sideboard is available in the following combinations of finishes:
