Massimo Mariani

---

Nei suoi primi progetti per Acerbis, Massimo Mariani ha applicato il suo approccio orientato ai materiali – che gli è valso il Compasso d'Oro – per creare la linea di tavolini Moodboard contraddistinti da versatilità per costruzione e composizione.

La collezione Moodboard, composta anche dalla console, è una famiglia di tavolini bassi di diverse dimensioni e forme con piani che combinano differenti materiali – legno, marmo e ottone – creando così un mosaico di materie differenti per tipologia, colore e texture. Un vassoio in acciaio o ottone lucido, facilmente integrabile con gli elementi di cui è composto il tavolino, può essere aggiunto come contenitore svuota tasche o vassoio di servizio.
