Anilina Information

Anilina leather is intended for true connoisseurs, to those who can fully grasp the charm of genuine leather. Dyed in barrel without any kind of finishing, it is the closest to the concept of leather as nature has created it. The not forced drying, simply in the air, as it was done once, further embellishes its softness. All the natural characteristics, such as wrinkles, chiaroscuro effects and imperfections enhance its genuine beauty, making each

a unique piece.

The inner side of the shell is covered with leather. The outer side of the shell is covered with micro-perforated leather.

The shell of Flow collection covered with Anilina leather is fully covered with leather, micro-perforated on the outer side. The seams are always in contrast colour.

washing information

ANILINA leather naturally shows differences in finish and color, visual irregularities, marks, shades and color unevenness, peculiarities of a natural material of the highest quality and synonymous of its value and uniqueness. Due to its extreme naturalness, it is also more delicate and sensitive than more treated leathers: the contact with liquids. with different materials and colors. as well as the direct exposure to the sunlight and heat sources could indelibly alter the color, while metal or sharp parts may affect the surface. For daily cleaning, simply dust with a soft, dry cloth. For a more thorough cleaning. it is expressly recommended to use specific products for leather, avoiding the use of water, soap and any aggressive detergents.

Acerbis

Noah is made out of 100% recycled polyester. It doesn't use any new raw materials and doesn't generate any waste. Subtly textured warp and weft yarns merge into a pleasantly soft weave with a minimalist quality. Noah's timeless design is simple to take care of and comes in a carefully selected colour palette of Mediterranean hues. Some details are important. Noah is made where we live and, like any other hometown, it's a place we want to keep flourishing. That's why we weave with recycled materials, certify our fabrics under OEKOTEX and work from a zero-waste, ISO 14001 accredited facility. Noah is PFCfree too.

Nuvola Information

The excellent quality of nuvola® leather comes from a careful selection of European cattle. nuvola® has a smooth and soft grain. The hides are dyed with a passing-through process, in the same dye as the finish. The colour card includes an extraordinary series of colours, obtained from a single quality of leather. The wide range of fashionable colours characterises nuvola® leather for its excellent range of use, tied to the most demanding design-proposals.

Inner side of the shell covered with micro-perforated leather. Outer side of the shell covered with leather.

The shell of the Flow collection covered with Nuvola leather is fully covered with leather, micro-perforated in the inner side. The seams are always in the same color.

Portofino

Portofino is linen used mainly for upholstery and upholstery, offered in 16 different variants.

Thanks to the pumice stone treatment the surface of the fabric presents light veiled effect. Ideal for vintage upholstery. Furthermore, the stain-resistant treatment makes the Portofino ideal for the creation of finished products that must last over time while maintaining their characteristics unchanged.

Ramiro

Fabric made entirely of polypropylene yarn, Ten Stars Yarn, exclusive patented, dyed in mass with an air flow texturization able to give the fabric a look and a softness comparable to natural fibers.

It is used for the production of outdoor furniture and it is 100% recyclable and made in Italy.

Its composition guarantees permeability and breathability and make Ramiro fabric suitable for a prolonged use in outdoor environments without compromising its appearance, hand and color.

Dry clean only. Do not wash in water. Treat with care when damp.

Dry clean with tetrachloroethylene, monofluorotrichloromethane, trifluorochloroethane, hydrocarbons. Severely limit the amount of water added and/or the mechanical action and washing and drying temperatures. Do not dry clean at automatic coin-operated laundry facilities.

Dry clean with perchlorethylene

Do not dry clean.

Dry cleaning with hydrocarbons and trifluoro-trichloroethane.

Wet-cleaning.

Do not tumble dry. Tumble dry.

Dry at low temperatures.

Do not centrifugate. Iron at low temperature without steam (max 110°C).

Ironing at moderate temperature (max 150°C).

Iron on reverse.

Do not iron.

Do not use chlorine bleach.

washing information Ordinary dirt stains such as coffee, soft drinks, milk, beer, etc. can be

removed by using a clean cloth or soft sponge and dabbing the stain with soapy water. Remove the soap solution by wiping the area with a cloth and

clean water.

Do not use chlorine, alcohol, or solvents.

Warning: non-colourfast fabrics (such as jeans or similar items) can leave

stubborn stains or spots on light coloured eco leather.
